CAMPUS ALERT UPDATE Procedures

p. 2 of 3 rev. 10/15/2010

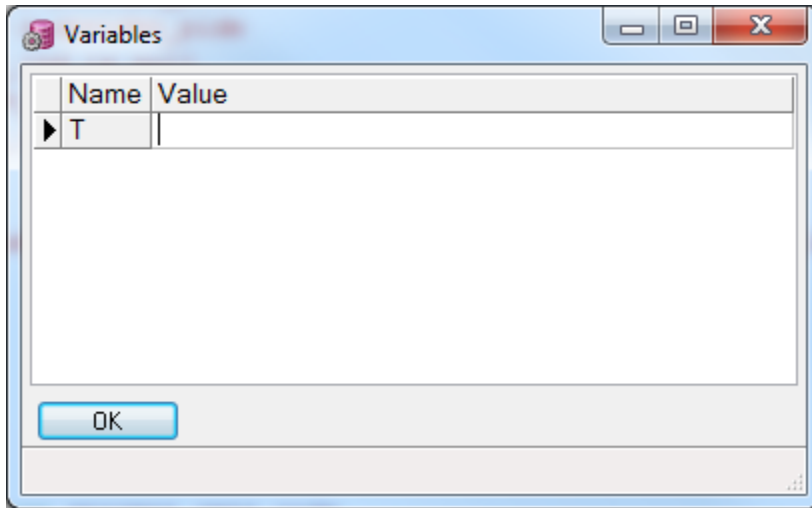

Description:

Process will refresh and update the temporary table `EMERG_NOTIF_M4D` by verifying records in Spriden, Spraddr, Goremal, and Sprtele.

Run Schedule:

These programs are run twice a month on the 6th and the 22nd of every month by RIS. If the date falls on a weekend or holiday then program is run on the next working day. This is done by running the SQL script `I:\RISW\SQL\enotify\enotify3` from PL/SQL Developer

Parameters to run:

Once script begins this screen should appear. Just Click OK. No Value needs to be entered.

Output Files:

Program will execute but no data will be shown. When it is completed, notify Dan Hightower (dan.hightower@sdbor.edu) that table has been refreshed.

Criteria:

Reads information from SPRIDEN, SPRADDR, SPBPERS, SPRTELE, GOREMAL and combines Name, Address, Telephone Number(s), and email into `EMERG_NOTIF_M4D` table.

CAMPUS ALERT UPDATE Procedures

p. 3 of 3 rev. 10/15/2010

Change Requests:

Script was modified in December, 2009 for Banner 8.0 update which changed the length on some columns.
